

Coach Profile

Nilesh Pandit—Auckland

Having worked on various manufacturing and non-manufacturing areas in multiple industries, Nilesh Pandit has extensive experience in effectively implementing lean principles in businesses.

With three-pronged multi-disciplinary qualifications of a Bachelor's Degree in Mechanical Engineering, Master's Degree in Operations Management and a Post Graduate Diploma in Business Information Systems, he is known to evaluate and implement the scope of lean projects thoroughly with proper balance of cultural and business results as also of long term and short term horizons.

Before starting the coaching career, Nilesh worked for more than 20 years in various manufacturing environments ranging from small and medium firms to large multinational conglomerates. He has worked in junior, middle as well as senior management over these years and hence he adapts the style of facilitation to suit the target audience. While being normally consultative, he adopts hands-on, analytical, collegiate or strategic approach as the situation demands.

Nilesh has been associated with multiple industries in New Zealand as a coach. Frucor Beverages, Taranaki Pine, Fletcher Aluminium, Metso, Tatua Dairy are a few among them. He also works as a guest facilitator for New Zealand Manufacturers and Exporters Association for their public diploma program in Auckland and presents lean concepts in MEA's events. He is a registered assessor for various Industry Training Organizations in New Zealand.

Nilesh is passionate about the lean implementation model that entails relating to various functions, hierarchical levels and diverse cultures and backgrounds — all at the same time — to effectively yield the targeted results with and through cultural enrichment.
