2-Day In-House Workshops

**Australasia's
leading productivity
improvement
provider**

Your Program Facilitators

Chris Benn Bob Carter

The Improve Group has collectively over 200 years experience in the delivery of world-class "Lean" principles in both Australia and New Zealand.

We have successfully helped transform companies using "Lean" in a number of industries, some have tripled their output within weeks of applying these concepts.

Your program facilitators are some of the most experienced lean practitioners' in Australasia with experience across many types of industry.

Please note—Your program facilitators may vary depending on location.

This course includes:

- ◆ Workbooks
- ◆ Hands-on exercises
- ◆ Case Studies
- ◆ Simulations

For Bookings:

Ph: +61 7 3488 2143
 E-mail: info@improvetgroup.com.au
 or visit www.improvetgroup.com.au

Increase your productivity, whilst reducing operating costs and overheads.

Lean Manufacturing identifies and eliminates non-value adding activities and creates additional capacity making your business more profitable.

Participants in this "Lean Manufacturing" course will learn the skills to apply lean problem solving and process efficiency concepts into their environment.

This two-day course will allow participants to learn and apply "lean" concepts resulting in improved lean processes creating breakthrough transformations.

Who should attend?

Production, Operations, Engineering and HR Managers, Business Owners and those seriously interested in improving their manufacturing processes.

Topics Covered:

Lean Concepts—Eliminating Manufacturing Wastes, Identifying Value Adding activities, making activities flow

Lean Tools—Value Stream Mapping, 5S, Workflow, JIT, Quick Changeovers, Standard Work, Mistake Proofing, Workcell Layout, Kanban

Accelerating Change—Quick and Easy Kaizen, 30/30 Kaizen, Visual Performance Management, Visual Innovation Management

Price: \$4,400 (plus GST) for up to 12 participants, includes all folders, reference material, templates, and much more.

Please note—the host company is responsible for venue and catering costs

Special offer
Certificate IV in
Competitive Manufacturing

If you enroll more than 10 participants into a government subsidized Competitive Manufacturing program with the Improve Group within 3 months of attending this program we will credit the price of this workshop from your Competitive Manufacturing program.

What is Lean?

Lean is a way of thinking about how a product or service flows through a series of processes in the most efficient way possible. Each activity or process must create value. It is a simple strategy that helps you create increased workflow through the elimination of waste and variation; and removing work imbalance. Lean is a way of thinking!

Do you need "Lean"?

- ◆ Do you experience long lead times and production backlogs?
- ◆ Do you have a high rework or defect rate?
- ◆ Do you need to change the culture of your business to remain competitive?
- ◆ Are you or your staff working under considerable stress to maintain productivity targets?

Benefits of our Lean Manufacturing Course

Do you want to be recognised as the best in your field? Our Lean Manufacturing program will help you get there. Our concepts are leading edge and have been designed by leading experts in Japan, USA and Europe.

We regularly take our clients to Japan and Europe to benchmark against the best. To find out more visit our Lean Study Tour Webpage at www.improvegroup.com.au.

Successful 'LEAN' clients.

Frucor, NDA Engineering, James Hardie, Hyne Timber, Ag Solutions, Gourmet Garden, Transpacific Industries, Terex Cranes, Bundaberg Brewed Drinks, NCI Packaging, BMA Coal, Siemens, PMP Print, Hally Labels.

What our clients say.

"The number of ideas that are coming from the factory floor to improve the workplace—it's like somebody has flicked a switch"— Henk Roling, Manufacturing Director, Frucor Beverages.

"I have found The Improve Group's coaching programs to be useful and effective tools in our drive towards lean excellence in manufacturing at our Panmure site"— Graeme Hughes, Manufacturing Manager, NCI Packaging

"I have to say that it was not a totally new concept to me. I just didn't know it had a name. It has been a great exercise looking at what we do and how we do it and understanding the whole process and being able to do it better. We tripled our output in 3 days!" - Paul Gibbs, Workshop Manager, NDA Engineering.

Lean principles are now defining world-class performers in business.
