

# AWARENESS

Subsidised training programs with nationally recognised qualifications

# 1

The Competitive Manufacturing program is providing the vehicle for developing the understanding from senior managers, and given its practical focus, ensures that improvement initiatives are actually undertaken, not just talked about in the classroom.

Brent Wollaston, Operations Director,  
Griffins Foods Ltd

## Overview

The Improve Group provides a range of educational workshops and structured training programs to nationally recognised standards. Many of these are subsidised and can provide formal qualifications to advanced diploma levels.

## Nationally Recognised Qualifications

These programs meet Australian and New Zealand training standards and as a Registered Training Organisation we are required to conform to quality audits for these programs. Choose from the range of programs below to make a difference to your performance.

- Certificate III to Advanced Diploma in Competitive Manufacturing
- Certificate IV in Frontline Management
- Certificate III and IV in Transport & Logistics (Warehousing and Storage)

## Introductory Workshops

Choose from our range of introductory workshops designed to prepare your staff with new skills in the workplace. These programs can be run in-house and tailored to suit your industry, or provided as public workshops. Many of these workshops can be used to gain credits towards national qualifications.

### Manufacturing and Processing

- Quick Changeovers
