

# STRATEGY

Performance reviews, gap analysis and action planning programs

# 3

Through the Competitive Manufacturing training The Improve Group has helped us to identify & implement strategies which have enabled our team to become focused on continual improvement, productivity, quality, & efficiency.

Trevor Zerner, Ag Solutions

## Overview

Defining the right things to do is one of the critical differences between an industry leader and an industry follower. The Improve Group provides a range of services designed to identify the key issues and opportunities within your business; we work with you to define suitable action plans and implementation strategies.

## Enterprise Connect Initiative

The Improve Group is a recognised provider with this Federal Government initiative which provides a free business review service to manufacturers and related services with a turnover of between \$1.5-100m per annum.

This free service will provide you with 2-5 days of business and operational reviews benchmarking your performance against international competition and developing recommended action plans to transform your business.

Companies completing the business review process are then eligible for government grants that assist with the implementation of the improvement strategy by The Improve Group.

## Operational Excellence Strategy

The Improve Group specializes in developing operational excellence strategies for all industries. Companies will complete a series of comparative benchmarks and a gap analysis is then completed identifying appropriate actions.

Benchmarks are currently available in a number of specialist areas:

- Lean Manufacturing
- Lean Supply Chain
- Lean Product Development
- Inventory Management
- Materials Handling
- Maintenance Excellence

Our team uses the value stream mapping process to identify improvement opportunities and works with your management team to develop improvement strategies for implementation. These strategies can be implemented by the customer, or we can provide assistance with implementation if required. Many companies find that programs that are facilitated by industry experts yield faster and more sustainable results.

The Improve Group partners with a range of strategic partners to deliver these services.
