

TRANSFORMATION

Implementation support programs that transform industry

4

The number of ideas that are now coming from the factory floor to improve the workplace - it's as though somebody has flicked a switch!

Henk Rolling, Managing Director, Frucor

Overview

Transforming a business into a world class organisation requires a change of culture and mindset. It needs a critical mass of support to get established and gain momentum. The Improve Group provides a range of programs to industry that support and facilitate these outcomes.

Lean Transformations

The Improve Group specialises in the implementation of lean initiatives – a concept first linked to Toyota, and now accepted as an industry standard for any organisation wishing to make a significant impact to their sector.

Lean Thinking is now well established in Europe and USA, and is a proven methodology for making dramatic improvements to customer services levels, whilst reducing the costs and overheads. The concept focuses on reducing unneeded activities and waste in processes, thus ensuring increased throughput at lower cost.

The key to unlocking the opportunities is to create a culture of continuous improvement and employee engagement – easily said, but often hard to do.

Industry Coverage

The Improve Group has proven programs for the following industries:

Manufacturing and Processing – Our Lean Manufacturing transformations are often supported by our subsidized training programs, and the Enterprise Connect program to ensure cost effective outcomes. Our links with US, UK and European partner organizations ensure that we stay ahead of the pack and implement state of the art programs.

Repair, Maintenance and Overhauls – We specialize in Lean Maintenance and Total Productive Maintenance programs. Find out how to make a difference to your equipment and asset performance by using these techniques.

Aviation – Leveraging our links to the US based Lean Aerospace Initiative we can make a major difference to your operations. This program provides a proven framework for success.

Office and Administration – Lean Office can be applied in any administration environment, our customers include government departments, banks, accountants, and engineering offices.

Supply Chain and Inventory Management – Often overlooked, this area provides multiple opportunities for improvement and often has large dollar values attached. Using IQR and Value Chain concepts our programs will make a real difference to your bottom line.
